REGION MONT-VENTOUX

Mont Ventoux and the **Dentelles de Montmirail** are among the most stunning regions in France. The delightful blend of wild nature and perched little villages is a treat for any cyclist.

The peaceful little roads, almost traffic-free, are an absolute joy. You can venture onto one of the three iconic climbs of the **giant of Provence**.

The estate, built in the 19th century, will enchant you. This haven of peace, surrounded by 3,500 m² of tree-lined and fenced grounds, is located in an exceptional setting, close to Vaison-la-Romaine, easily accessible by foot or bike.

The estate can accommodate up to 26 people, even at the beginning of the season, thanks to its spacious common areas. The outdoor pool, measuring 20 meters, allows you to cool off after your outings. A spa area with a sauna will warm you up during the cooler excursions.

Wi-Fi is available throughout the building.

REGION DRAGUIGNAN

Behind the tourist beaches of the **Côte d'Azur**, the Provençal hinterland offers you extraordinary tranquility and natural beauty.

Nearby the villa is the spectacular **Verdon Gorge**, one of France's greatest natural wonders.

You can cycle directly from Villa La Bastide. In the surrounding area, there are many small roads and plenty of opportunities for other sports such as climbing, hiking, canoeing, and more.

The Mediterranean is within easy reach. Sainte-Maxime and Fréjus are about 40 km away.

La Bastide is located on a hill, surrounded by a park of 26,000 square meters with several terraces, gardens, and pools. The garden is fragrant with pine, lavender, and roses. The center of Lorgues is just a few minutes from the villa.

The comfortable pool terrace and the large sunny terrace with an olive grove are perfect for relaxing after a bike ride. A game of pétanque can, of course, be played as an aperitif.

La Bastide also includes two small gîtes. A total of up to 40 people can stay there. All rooms are equipped with single beds.

The common areas and bedrooms on the second floor are equipped with air conditioning. The first floor stays cool thanks to the thick walls built in the 18th century.

Wi-Fi is available throughout the building.
